SUMMARY

Senior UX designer with 10 years of experience designing SaaS products, mobile applications, and complex multi-surface experiences end to end. Deep background in interaction design, visual design, systems thinking, and translating user research into intuitive, delightful interfaces. Comfortable working across disciplines alongside engineers, product managers, and creative teams to deliver cohesive experiences. Experienced moving fluidly between high-level strategy and fine-grained execution. Passionate about making powerful tools feel effortless and joyful to use.

PROFESSIONAL EXPERIENCE

Workleap (formerly Pingboard) | Senior Product Designer | Jan 2022 - Present | Remote

- Co-led principal-level platform redesign applying systems thinking across the full product surface, ensuring cohesion across navigation, settings, IA, and AI-native workflows.
- Designed employee-facing mobile app surfaces for Pingboard including profile, filters, and to-do workflows across iOS and Android alongside the core web product.
- Redesigned onboarding experience and improved completion rate from 43% to 85% through continuous user research, usability testing, and iterative A/B experimentation, bringing clarity and simplicity to a complex multi-step flow.
- Drove rapid prototyping across varying levels of fidelity, from early whiteboard-level concepts through high-fidelity interactive prototypes, adapting output to what each stage of the process needed.
- Partnered closely with engineers, PMs, and business stakeholders across disciplines to drive solutions through to completion, presenting design rationale clearly to collaborators at every level.

EAGLE6 | Principal Product Designer | Jan 2016 - Jun 2022 | Sellersburg, IN

- Directed full UX vision for a federal cybersecurity platform, designing for expert users who required clarity, speed, and zero-error workflows across dense, complex interfaces.
- Built and maintained a WCAG/Section 508-compliant design system and component library ensuring visual and interaction consistency across the full product surface.
- Conducted contextual research, card sorting, and usability testing to restructure information architecture and measurably reduce task complexity.
- Designed high-fidelity prototypes for enterprise sales cycles, communicating interaction design rationale to diverse stakeholder groups across engineering, procurement, and leadership.

CORE SKILLS & TOOLS

UX/UI Design · Interaction Design · Visual Design · Mobile and Web Application Design · Systems Thinking · Information Architecture · Usability Testing · User Research · A/B Testing · Continuous Discovery · iOS and Android · Figma · FigJam · Jira · Confluence · Agile · Accessibility (WCAG / Section 508)
